

Flip It Down

Advanced Code Reading Game

Materials: Make a copy of a game board for each player. Cut the right hand column on the rows so that each is on a strip of paper that can be folded over to the left. If you want to laminate the game board add a piece of Velcro to the edges to keep the strip down once flipped.

Directions: Students take turns rolling a die (I used a 12 sided one) or dice (1 or 2). Students read the word that corresponds to the number they roll, they "flip down" the word by folding it over. First one to flip down all of the words is the winner.
